

Never miss a domain or SSL renewal again

For solo operators running the whole business.

Who this is for

Solo operators and one-person businesses who wear every hat â sales, delivery, admin, and support â and need leverage without hiring a department.

Expired domains are silent business killers.

Suggested stack

Auto-renew on + calendar reminders + card on file. Primary tools: Namecheap, Google Calendar, Zapier.

Do this

1. Turn on auto-renew for every domain and keep a backup card.
2. Spreadsheet or Notion: domain, registrar, expiry.
3. Calendar event 30 days before each expiry.
4. Monitor SSL with your uptime tool or host alerts.

Operator tip

Lock domains and enable 2FA on the registrar. Hijacks hurt more than expiry.
